Project: ABIA Elevator Refurbishment – Phase 2

C.I.P. No: 6001.093

IFB No: 6100 CLMC780

SUBJECT: Answers to Bidders' Questions No. 1

**The following are answers to Bidders' questions received on the above project. These answers do not modify the Bid Documents. Any modifications to the Bid Documents will be through an Addendum.**

Q-1: Is there a designated area for tool storage? Can we store them in the elevator cab?

A-1: Due to the different locations of the elevators, individual secure areas will need to be identified for each elevator during construction. Tools may be stored in the cab if the elevator cab can be securely closed to public access.

Q-2: What type of closure requirements are required for elevators?

A-2: The specifications outline detailed closure requirements. The intent is to separate the public completely from the construction activity.

Q-3: What electrical work is required?

A-3: The plans show the required work in the elevator shafts and mechanical rooms. The specification SS142400 outlines the electrical work required on the elevator equipment.

**END.**
